

Galen's Gift Wrapping Tips

1. Re-using is entirely different than re-gifting – don't be ashamed to re-use things! Re-using paper, embellishments, ribbon, and other materials allow for personalization. If decorative wrapping is not within your budget, re-using can save money and allow you to individually style every recipient's gift!
2. Get creative! Try things until you find what you like and what works. Don't jump in without a plan – lay out ideas for wrapping with the actual gifts so you can gauge size, quantity, etc.
3. Source unique and exciting paper, embellishments, ribbons and other creative materials from local shops and galleries all year long. Keep in mind you can use one of something – not every package should look the same.
4. Develop a theme to keep your purchases in line with the end goal.
5. Don't do it if you don't enjoy it – Niche can do it for you!
